
Thomas Harrop

twharrop@gmail.com · tomharrop.io

I am a genomics scientist working with large-scale bioinformatic and genetic datasets.

Technical skills

I'm an experienced bioinformatician, geneticist and molecular biologist.

My main tools for programming and data analysis are Python and R. I use workflow managers, version control, containerisation and high-performance computing for bioinformatics. I'm also experienced with bash scripting and *nix system administration.

I am currently using my strategic development and user support skills in the context of a team working to provide national bioinformatics infrastructure, in collaboration with a distributed global team.

I am skilled at the entire wet-lab workflow for producing short and long read sequencing libraries, from nucleic acid extraction to library preparation and running instruments for 2nd- and 3rd-generation sequencing. I have experience with classical genetic approaches with live organisms, including transformation, crosses, microdissection and bioassays.

I enjoy communicating complex bioinformatics and genetic results to research partners, external stakeholders and students. I visualise and share my results with ggplot2, Markdown, Pandoc, TeX and a bit of html & css. I teach complex bioinformatics algorithms to postgraduate students in classroom and one-on-one settings.

Research

I'm interested in research related to agriculture and sustainable development, tools and techniques in bioinformatics and evolutionary and comparative biology.

Experience

Current positions

- 2023–Present** **Scientific Officer**, CSIRO, Clayton, Australia.
I contribute to development of a genomics platform for natural resource management. This involves experiment design, method development and data analysis to address challenges in conservation genomics, species identification, and biodiscovery in plants and insects.
- 2021–Present** **Academic Specialist**, Melbourne Bioinformatics, University of Melbourne, Australia, and **Bioinformatician**, Galaxy Australia.
I provide training and support to researchers and projects who use bioinformatics in Melbourne's biosciences precinct. I am part of the team that develops and runs Galaxy Australia and global Galaxy infrastructure.

Previous research and University positions

- 2020–2021** **Research Fellow**, Biochemistry Department, University of Otago, Dunedin, New Zealand.
I began developing an independent genomics and bioinformatics research program related to genomic selection and pest management problems in New Zealand.
- 2017–2020** **Post-doctoral researcher**, Laboratory for Evolution and Development, Biochemistry Department, University of Otago, Dunedin, New Zealand.
In this postdoc position I worked on a project to develop and apply tools to integrate genomic selection to breeding programmes to improve honeybee performance.
- 2016–2017** **Post-doctoral researcher**, Laboratory for Evolution and Development, Biochemistry Department, University of Otago, Dunedin, New Zealand.
I worked on a bioprotection project investigating the resistance of Argentine stem weevil to its biological control agent.
- 2014–2016** **Post-doctoral researcher**, UMR DIADE, Institut de Recherche pour le Développement (IRD), Montpellier, France.

We used RNA sequencing to characterise molecular events that occur during development of inflorescence architecture in rice, which affects crop yield, and applied these results to study the effects of selection on gene expression during the parallel domestications of African and Asian rice.

2013–2014

Post-doctoral researcher, Department of Plant Breeding and Genetics, Max Planck Institute for Plant Breeding Research, Cologne, Germany.

At the Max Planck Institute I worked on a bioinformatic and molecular biology project to compare the transcriptional response of different land plants environmental signals.

Professional positions

2004–2007

Medical scientist, Network Pathology, the Austin Hospital, Heidelberg, Australia.

2001–2004

Laboratory assistant, Network Pathology, the Austin Hospital, Heidelberg, Australia.

Education

2006–2012

Doctor of Philosophy, Department of Genetics, the University of Melbourne, Parkville, Australia.

Thesis: *The functions of cytochrome P450s in Drosophila.*

I used classical genetics and modern molecular biology, including transgenic manipulation of gene expression and comparative studies of gene function, to investigate the functions of cytochrome P450 genes in the *Drosophila* genus.

2002–2005

Bachelor of Science with Honours (first class), the University of Melbourne, Parkville, Australia.

Awards

2006–2009, Australian Postgraduate Award

Personal information

Languages

English (native)

German (**TELC Level** B2)

French (**TELC Level** B1)

Nationalities

Australian and British

Teaching

2021–current	BINF90002, Elements of Bioinformatics , guest lecturer.
2021–2023	COMP90014, Algorithms for Bioinformatics , Masters of Bioinformatics, The University of Melbourne. Subject coordinator and lecturer. BINF90002, Elements of Bioinformatics & COMP90016, Computational Genomics . Guest lecturer.
2020	GENE412 , Genetics Department, The University of Otago.
2017–2019	GENE312 project supervisor, Genetics Department, The University of Otago.
2007–2011	3rd Year Genetics , Department of Genetics, The University of Melbourne, Parkville, Australia.
2006–2009	High School Biology , Department of Genetics, The University of Melbourne, Parkville, Australia.
2006–2008	High School Biology , Gene Technology Access Centre, The University High School, Parkville, Australia.
2005–2008	1st Year Genetics , The University of Melbourne, Parkville, Australia.

Students (co-)supervised

M.Sc. program	Four graduate research students, Masters of Science (Bioinformatics) , University of Melbourne.
Sarah Robinson	Bachelor of Science with Honours , Genetics, University of Otago, Dunedin, New Zealand.
Marissa Le Lec	Bachelor of Science with Honours , Genetics, University of Otago, Dunedin, New Zealand.
Swarit Jaisal	Master of Science , Life Science Informatics, Universität Bonn, Germany.
Axel Verdier	Master of Science , Sciences et Technologies de l'Information et de la Communication pour la Santé, Université de Montpellier, France.

Service

Community group	Founder and convenor of the popular <i>Bioinformatics Meetups</i> group for people using bioinformatics in the local research community, hosted by Melbourne Bioinformatics.
Genome Annotation	Workshop development and lead trainer, Melbourne Bioinformatics, 12 March 2024.
NextFlow	Trainer, CSIRO pipeline development workshop, 23–24 August 2023.
Galaxy development	Tool Development and Galaxy + R training workshops, <i>Galaxy Community Conference</i> , 10–16 July 2023.
RNA-seq	<i>From reads to differentially expressed genes</i> workshop for Australian BioCommons, 23–24 February 2021. Lead trainer, Melbourne Bioinformatics, 2021–2023.
Reproducible research	<i>Reproducible research workflows with containers</i> webinar for New Zealand eScience Infrastructure (NeSI), 23 July 2020.
Sequencing workshop	Invited instructor for the <i>Long-read, long-reach sequencing workshop</i> . November 2019, ANU, Canberra, Australia.
MapNet	Main organiser for the <i>2018 MapNet conference</i> . November 2018, Dunedin, New Zealand.
Nanopore workshop	Main organiser for <i>Genomics Aotearoa's long-read sequencing workshop</i> . April 2018, Dunedin, New Zealand.
Carpentries	Assisting instructor for Carpentries workshops: <i>Data Carpentry, 2019</i> ; <i>RNA-seq-workshop, 2020</i> .

Publications

Selected scientific presentations

Genetic diversity and biocontrol in Argentine stem weevils. Genomics Aotearoa seminar series, New Zealand, 2021.

The genomes of three invasive social wasps. **Oral presentation** at the Annual Conference of the Genetics Society of Australasia (GSA), Melbourne, Australia, 2019. **Symposium chair**: Genomics & bioinformatics.

*Comparative genomics of sexual and asexual parasitoid wasps from the *Microctonus* genus*. **Poster presentation** at the 7th meeting of the European Society for Evolutionary Developmental Biology, Galway, Ireland, 2018.

Genomics of a weevil pest and its parasitoid biocontrol agent. **Poster presentation** at the Annual Conference of the Genetics Society of Australasia (GSA) with the New Zealand Society for Biochemistry and Molecular Biology (NZSBMB), Dunedin, New Zealand, 2017.

De novo sequencing of Argentine stem weevil and its parasitoid wasp biocontrol agent. **Poster presentation** at the 10th Annual Arthropod Genomics Symposium, Notre Dame University, South Bend, U.S.A., 2017.

*Sequencing and community annotation of the *Vespula vulgaris* genome*. **Oral presentation** at the Entomological Society of NZ Conference, Wellington, New Zealand, 2017.

Genes controlling transition of reproductive meristem identity during inflorescence development. **Oral presentation** at the 14th International Symposium on Rice Functional Genomics, Montpellier, France, 2016.

Mechanisms underlying the parallel evolution of inflorescence phenotype during independent domestication of African and Asian rice. **Contributed oral presentation** at the 6th meeting of the European Society for Evolutionary Developmental Biology, Uppsala, Sweden, 2016. **Joint symposium chair:** Branching across the tree of life.

Gene expression during O. sativa panicle development. **Invited seminar** at the Agricultural Genetics Institute, Hanoi, Vietnam, 2015.

Molecular mechanisms underlying the phenotypic convergence of inflorescence architecture in domesticated rice species. **Poster presentation** at the Society for Molecular Biology and Evolution annual meeting, Vienna, Austria, 2015.

Transcriptomic analysis of early developmental stages of the rice panicle. **Poster presentation** at the Workshop in Molecular Mechanisms Controlling Flowering, Aiguablava, Spain, 2015

RNA interference of the Cytochrome P450 redox partners Cpr and dare uncovers novel P450 functions in Drosophila melanogaster. **Poster presentation** at the 50th Annual Drosophila Research Conference, Chicago, USA, 2009.
